

ABSTRACT

The present invention provides an edge band including a protective layer attached to a wood portion. The wood portion includes a first side and a second side. A first adhesive is disposed between the protective layer and the first side of the wood portion and a second adhesive is disposed on the second side of the wood portion and may be used to attach the edge band to an article. The protective layer can be removed from the band when desired, for example, following the application of a finishing material to the associated article.
